RAIN PROTECTION

YOUR EXTRA COMFORT

High wearing comfort and weather protection when you need it. ALBATROS® rainwear is so flexible that you can always move easily - wether at work or in leisure time.

AQUALOCK

WE DON'T LEAVE YOU
OUT IN THE RAIN

You can rely on the AQUALOCK rain protection range from ALBATROS® – be it on building sites or in agricultural environments, this rainwear will withstand the heaviest rain.

It is made of a high-quality polyurethane that is elastic and highly tear-resistant even at sub-zero temperatures and won't be unduly harmed by a scratch or two.

The polyurethane (PU) makes it reliably wind and waterproof, with a water column of 8,000 mm. The taped seams keep both rain and snow at bay. The perfect companion for rainy weather!

The degree of water tightness is measured in water column.

To identify the tightness, 10 cm² of the corresponding material is stretched under a cylinder and then exposed to water. The pressure on the material will be increased by 10 mm per second.

The time is measured until drops of water are formed on the bottom of the material. At the water column the pressure is measured at that time in millimeter.

According to the European standard a material is waterproof from 800 mm pressure.

ACCESSORIES

LITTLE THINGS MAKE THE DIFFERENCE

Quickly packed and with you wherever you go - the little helpers. They protect you against wind, water, cold, sun, are very functional and look great.

Humans can only achieve maximum performance at a constant body temperature. Our functional underwear absorbs the body moisture, however doesn't store it, but transports it to the textile's outside where it can evaporate quickly. The body thus remains dry even during physical exertion and is protected against cooling.

BREATHABLE

Our functional underwear is breathable and fast drying. A good moisture transport keeps the skin dry.

HIGH THERMAL INSULATION

The brushed surface inside of shirt and trousers creates a particularly high thermal insulation.

SAFETY SHOES

WE CONCENTRATE ON THE ESSENTIAL-
YOUR SAFETY

As varied as the daily challenges you have to face. ALBATROS® safety shoes are designed and developed by an international team of experts for personal protection equipment (PPE). For more than 40 years we increase quality, comfort, functionality and design in the long term for your safety.

SAFETY SHOES

OVERVIEW

EN ISO 20345:2011 Safety footwear with protective toe cap for high loads that offer protection against impacts with an energy of up to 200 joules and withstand compression with up to 15,000 Newton.

SB

Basic requirements e.g. tear strength and water-repellent properties of the upper as well as substance, tear strength, abrasion resistance, resistance to flex cracking and oil resistance of the outsole.
Can be with open seat region (Safety Basic - SB)

S1

as SB, additionally closed seat region, antistatic properties and energy absorption of the seat region.

S1P

as SB, additionally to the basic requirements with closed heel area, antistatic, energy absorption of the heel area, fuel and oil resistant outsole and with penetration resistant midsole.

IMPULSE.FOAM®
ANTI-FATIGUE TECHNOLOGY

DUAL.IMPULSE MIDSOLE

The first safety shoe line with a double-foamed, extremely light dual.IMPULSE midsole. The intelligent sole concept made up of two individual layers of IMPULSE.FOAM offers everything: maximum cushioning with up to 55% active energy return as well as excellent stability and long-lasting comfort.

1

SLIP RESISTANT OUTSOLE

The easy to clean rubber outsole ensures perfect ground contact. It is non-slip and abrasion resistant as well as heatresistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimum flexion, optimize the water-displacing properties (windscreen wiper effect) and provide firm grip on a wide variety of grounds.

ESD

ESD-compatible safety shoes must be worn when electrostatic charges have to be reduced by discharge. This is e.g. the case when working with sensitive electronic components, that could be damaged or destroyed by electrostatic discharge.

2

SAFETY KNIT

The highly flexible, breathable textile fabric adapts perfectly to your foot and fits seamlessly like a sock. It gives you optimal support, is super light and ultra durable at the same time.

3

FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

COMFIT® AIR FOOTBED

(Art. No. 20.475.0)

The extra comfort in your safety footwear. The newly developed, breathable ALBATROS® comfit®AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. This helps the foot keeping its natural position in the shoe and stimulates the musculature while walking. The slip-resistant textile cover is odour-resistant, moisture absorbing and washable at 30°C.

FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

3

CUSHIONING MIDSOLE

This soft PU midsole optimally cushions the high impacts of walking and combines perfect stability with flexibility.

FAP - FLEXIBLE ANTI-PENETRATION

FAP® is a non-metallic material, especially for safety footwear, made of multiple textile layers of extremely tearproof fibers. The FAP® midsole offers greater comfort, flexibility, cold insulation, humidity absorption and shock absorption to the wearer.

EVA FOOTBED

The anatomically shaped footbed made of soft EVA helps to protect the joints, muscles and bones with its shock-absorbing effect. An ergonomic longitudinal arch support provides optimal support for the foot when walking, while the dimpled forefoot area massages the front part of the foot with every step. The perforation in the ball area increases breathability. Everything for a comfortable fit..

1

SLIP RESISTANT OUTSOLE

The abrasion-resistant, cushioning DUO-PU sole is particularly characterized by its flexibility and slip resistance. The sole profile has wide flex grooves and differently designed profile elements for excellent grip on different floors, especially on industrial floors.

XTS TRAIL

TRAIL INSPIRED, WORK READY

SLIP RESISTANT XTS TRAIL OUTSOLE

The easy-to-clean rubber outsole ensures perfect contact with the ground. It is non-slip and abrasion-proof and heat-resistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimal flexion, optimize the water-displacing properties (windshield wiper effect) and provide a secure hold on a wide variety of surfaces.

IMPULSE.FOAM® MIDSOLE

The new innovative IMPULSE.FOAM® midsole reacts to each of your steps with an energy impulse. IMPULSE.FOAM® offers everything: Maximum cushioning with optimum energy return as well as excellent stability and longlasting comfort.

COMFIT® AIR FOOTBED

(Art. No. 20.475.0)

The extra comfort in your safety footwear. The newly developed, breathable ALBATROS comfit® AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. TREKSTAR XP

THE NEW WORK **EX**PERIENCE

1 SLIP RESISTANT XTS OUTSOLE

The off-road profile of the up to 300°C heat-resistant, non-slip rubber outsole (HRO, SRC) ensures optimal ground contact, especially on unpaved surfaces. The wide studs clean themselves while running (mud release) and ensure maximum flexibility.

2 JOINT STABILISATION

The carbon-look joint stabilization runs around the heel, which additionally protects against ankle twisting and supports the position of the foot in the shoe.

3 COA.TEX® MEMBRANE

The durable, water resistant and windproof high-tech membrane is particularly breathable and protects the foot from waterlogging through a microporous fabric structure. The membrane transports sweat and moisture to the outside. What remains is a pleasantly dry and comfortable foot feeling.

4 FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

EVERCUSHION® CUSTOM FIT MID FOOTBED

(Art. No. 20.485.0)

The anatomically shaped evercushion® CUSTOM FIT MID footbed provides optimal cushioning with every step. The specially coordinated arch support enables the natural positioning of the foot in the shoe and stimulates the muscles when walking. Also available in the retail pack in the Versions LOW and HIGH, for narrow ones or wide feet.

ESD

ESD-compatible safety shoes must be worn when electrostatic charges have to be reduced by discharge. This is e.g. the case when working with sensitive electronic components, that could be damaged or destroyed by electrostatic discharge.

QUICK LOCK

Press, turn and the shoe sits perfectly on the foot - permanently. The precisely adjustable twist lock of the QUICK LOCK lacing system is as simple as it is ingenious. If you pull on the fastener, the laces come loose. Another advantage - operable with gloves.

FEATURES OF ALL STYLES

Protection: fiberglass toe cap and non-metallic, flexible FAP® midsole
Extra: ESD, breathable functional lining, Quick Lock lacing system

Footbed: evercushion® CUSTOM FIT MID
Sole: TREKSTAR XP - 300° heat resistant, profiled, especially slip resistant, self-cleaning outsole with joint stabilisation in carbon optic

The soft and extremely lightweight EVA midsole offers optimum cushioning in the heel and forefoot area, where most of the stress during walking arises and improves the flexing action of the foot.

FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

FAP - FLEXIBLE ANTI-PENETRATION

FAP® is a non-metallic material, especially for safety footwear, made of multiple textile layers of extremely tearproof fibers. The FAP® midsole offers greater comfort, flexibility, cold insulation, humidity absorption and shock absorption to the wearer.

AEROWORK MESH

Due to AEROWork Mesh the shoe is ultra light and breathable as the open-pored material ensures optimal ventilation and minimizes sweating. Reinforcements at the sides connected with the lacing system provide perfect fit and stability.

DGVU 112-191 (BGR 191)

Shoes marked with this icon can be equipped by certified orthopaedists or health care supply stores with orthopedic insoles according to DGVU 112-191 (BGR 191).

1

FREESTYLE SR SOLE

The centrepiece of this line is the sole (SRC), for which a bonded concept was deliberately omitted. The material combined PU/PU and the special pattern with a lot of profile allow enormous flexibility and excellent cushioning despite the flat optic.

2

CUSHIONING PU MIDSOLE

The lightweight PU midsole provides optimal cushioning over the whole foot and shock absorption even on uneven grounds.

3

STEEL TOE CAP

The spacious fit ensures pleasant wearing comfort.

4

ROTATION POINT

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most overused element when walking during the job. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

ESD

ESD-compatible safety shoes must be worn when electrostatic charges has to be reduced by discharge. This is e.g. the case thwn working with sensitive electronic components, that could be damaged or destroyed by electrostatic discharge.

COMFIT FOOTBED

This footbed ensures a pleasant and comfortable foot sensation. A dimensionally stable and breathable material of light PU foam combined with an abrasion resistant Mesh cover absorbs moisture and guarantees optimal cushioning to relieve ligaments and joints. The anatomical form and the arch support ensure perfect fit at the feet. Washable at 30°C.

PROFI LINE CSL

ALLROUND GENIUS WITH MAXIMUM
FREEDOM OF MOVEMENT.

DIMENSIONALLY STABLE MIKROFASER

The metal-free upper made of high-quality, durable microfiber is extremely robust and easy to clean. Reflective elements improve the visibility of the wearer.

1

CSL SOLE

The material combination PU/PU and the thin sole concept offer excellent flexibility and cushioning. The special sole profile is slip resistant according to category SRC.

2

CUSHIONING MIDSOLE

The innovative, directly injected, lightweight sandwich PU sole ensure maximum flexibility for an natural motion sequence.

3

FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

ESD

ESD-compatible safety shoes must be worn when electrostatic charges has to be reduced by discharge. This is e.g. the case thwn working with sensitive electronic components, that could be damaged or destroyed by electrostatic discharge.

COMFIT® AIR FOOTBED

(Art. No. 20.475.0)

The extra comfort in your safety footwear. The newly developed, breathable ALBATROS comfit® AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. This helps the foot keeping its natural position in the shoe and stimulates the musculature while walking. The slip-resistant textile cover is odour-resistant, moisture absorbing and washable at 30°C.

FEATURES OF ALL STYLES

Protection: fiberglass toe cap and non-metallic, flexible FAP® midsole
Extra: ESD, DGUV, breathable 3D Mesh functional lining

CRAFT^{HD}

HIGHEST FLEXIBILITY
WITH MAXIMUM PROTECTION

1

CRAFT^{HD} SOLE

Specially designed for the CRAFT^{HD} PU outsole with different and application-optimized profile elements. In addition, the improved grip and the optimal moisture-displacing profile (windshield wiper effect) ensure a secure hold.

2

CUSHIONING MIDSOLE

A soft PU midsole optimally cushions the high impacts when walking and combines perfectly stability and flexibility.

3

FULL LEATHER

The high-quality full leather is characterized by a dense fiber fabric and thus by high stability, resilience and flexibility. In the design, we made sure to use as few seams as possible, among other things to enable easy cleaning in the event of soiling.

COMFIT[®] RELAX MEMORY FOAM FOOTBED

(Art. No. 20.480.0)

The thermal foam of the COMFIT[®]RELAX footbed adapts individually to your foot shape through body heat and thus achieves an optimal pressure distribution over the entire tread surface.

The foot is relieved and gets more support. After taking it off, the footbed returns to its original shape (memory effect). The textile cover used is robust, absorbent, washable at up to 30°C (hand wash) and quick drying. Perfect for the long working days!

X-TREME

HEAVY DUTY FOR
TOUGH JOBS

1

X-TREME SOLE

The "all terrain" cleat pattern made of nitrile rubber is designed to have good slip resistance (SRC) on smooth and uneven surfaces. The sole is also characterized by a polurethane foamed comfortable midsole that provides underfoot cushioning and heel shock absorption. It is heat resistant to 300°C (HRO) and has a robust scuff cap.

2

MULTISHIELD

The special Multishield® leather is, when properly cared for, farmyard resistant, automotive fluid resistant, resistant to dilute acids and alkalis, water resistant and breathable, flame resistant and mold resistant.

3

SCUFF CAP

Abrasion and scratch resistant scuff cap protects the shoe from abrasion especially during kneeling position.

4

HEEL SUPPORT

Dieser TPU Fersenschutz bildet mit der Nitril-/Gummisohle eine perfekt abgestimmte Funktionseinheit. Der Fersenschutz gibt zusätzlichen Schutz und Halt und verstärkt die Stabilität sowie die Führung des Schuhs.

FAP - FLEXIBLE ANTI-PENETRATION

FAP® is a non-metallic material, especially for safety footwear, made of multiple textile layers of extremely tearproof fibers. The FAP® midsole offers greater comfort, flexibility, cold insulation, humidity absorption and shock absorption to the wearer.

COA.TEX® MEMBRANE

The durable, water resistant and windproof high-tech membrane is particularly breathable and protects the foot from waterlogging through a microporous fabric structure. The membrane transports sweat and moisture to the outside. What remains is a pleasantly dry and comfortable foot feeling.

TREKSTAR WORK

DYNAMIC MULTI-TALENT

SAFETY SHOES // TREKSTAR WORK

XTS TREKSTAR OUTSOLE

The XTS outsole (cross terrain) is absolutely sure-footed. The self-cleaning sole profile with specially arranged and shaped studs adapts perfectly to the ground, ideal especially on unpaved surfaces. The hard-wearing TPU material is non-slip (SRC), antistatic and oil and petrol resistant. A shock absorber in the heel area ensures a softer step and protects the joints.

2

CUSHIONING MIDSOLE

A soft PU midsole optimally cushions the high impacts when walking and combines perfect stability and flexibility.

3

FIBERGLASS TOE CAP

Highly resistant toe cap of fiberglass-reinforced synthetic material. Excellent corrosion behaviour, good electrical, thermal insulation effect and anti-magnetic.

4

FULL LEATHER

Fine full leathers in combined with high-tech textiles perfectly crafted with skilled workmanship offer superior comfort and guarantee an everlasting wearing pleasure.

5

SCUFF CAP

Abrasion and scratch-resistant cap that protects the shoe from wear and tear, especially when kneeling, and thus extends its lifetime.

WORK & HIKE XTS TRAIL

TREKKING SHOE THAT WON'T LET YOU
DOWN, EVEN AT WORK.

FITFRAME ELEMENTS

Innovative designs, high functionality and a low weight - with FITFRAME® no problem. Seamlessly welded reinforcements combined with breathable textiles ensure maximum breathability and comfort.

1

SLIP RESISTANT XTS TRAIL SOLE

The easy-to-clean rubber outsole ensures perfect contact with the ground. It is non-slip and abrasion-proof and heat-resistant up to 300°C (HRO). The specially designed cleat profile and the wide flex grooves guarantee optimal flexion, optimize the water-displacing properties (windshield wiper effect) and provide a secure hold on a wide variety of surfaces.

4

ABRASION PROTECTION

The robust material in the toe area protects against abrasion especially during kneeling positions and extends thereby the lifetime of the shoes.

2

IMPULSE.FOAM® MIDSOLE

The new innovative IMPULSE.FOAM® midsole reacts to each of your steps with an energy impulse. IMPULSE.FOAM® offers everything: Maximum cushioning with optimum energy return as well as excellent stability and longlasting comfort.

3

SAFETY KNIT

The highly flexible, breathable textile fabric adapts perfectly to your foot and fits seamlessly like a sock. It gives you optimal support, is super light and ultra durable at the same time.

COMFIT® AIR FOOTBED

(Art. No. 20.475.0)

The extra comfort in your safety footwear. The newly developed, breathable ALBATROS comfit®AIR footbed has elevations in the heel and ball area of the foot as well as a support of the longitudinal arch. This helps the foot keeping its natural position in the shoe and stimulates the musculature while walking. The slip-resistant textile cover is odour-resistant, moisture absorbing and washable at 30°C.

EN ISO 20347:2012

All models are certified according to EN ISO 20347:2012 and have, among others, the following features: closed heel area, antistatic and energy absorption capacity in the heel area. Shoes of class O2 additionally have a waterresistant upper.

WORK & HIKE

LIGHTWEIGHT AND ROBUST

1

SLIP RESISTANT OUTSOLE

A low weight and best grip on a wide variety of grounds characterize this due to its sole pattern with wide flex grooves extremely flexible PU sole.

2

BREATHABLE TEXTILE INSERTS

Abrasion resistant, quick drying textile inserts ensure more breathability and improve the wearing comfort.

3

CUSHIONING MIDSOLE

A soft PU midsole optimally cushions the high impacts when walking and combines perfect stability and flexibility.

4

ABRASION PROTECTION

The abrasion resistant toe cap and heel area protect the shoes from scrapes and bumps.

HIGH QUALITY UPPERS

The soft, but robust uppers like suede leather adapt perfectly to the foot. Textile inserts provide a bonus in lightweight and breathability. The perfect workmanship ensures long comfort.

135

COA.TEX® MEMBRANE

The durable, water resistant and windproof high-tech membrane is particularly breathable and protects the foot from waterlogging through a microporous fabric structure. The membrane transports sweat and moisture to the outside. What remains is a pleasantly dry and comfortable foot feeling.

TECHNOLOGIES & MATERIALS

FOR HIGHLY COMFORTABLE WORKING

IMPULSE.FOAM®

The innovative IMPULSE.FOAM® midsole technology reacts to each of your steps with an energy impulse. Thereby the IMPULSE.FOAM® does not only return up to 55% of the energy, but also provides maximum cushioning, excellent stability and long-lasting comfort. IMPULSE.FOAM® - THE ANTI-FATIGUE TECHNOLOGY!

Innovative designs, high functionality and a low weight - with FITFRAME® no problem. Seamlessly welded reinforcements combined with breathable textiles ensure maximum breathability and comfort. There is a high flexibility, as there are no seams in flex areas. Furthermore, FITFRAME® means high resistance, an adaptable, perfect fit, more stability and support. The small weight also offers a delightful wearing comfort.

Our XTS sole is made out of a special rubber compound. Therefore, it is particularly durable, absorption-active, heatresistant up to 300°C (HRO) and slipresistant (SRC). The differently formed and especially arranged profile elements offer support and surefootedness on every ground and have selfcleaning properties. Furthermore, the sole is oil and fuel resistant as well as antistatic.

SOFTSHELL

Softshell jackets are real all-round talents. They keep off the rain, protect against wind and are at the same time breathable, comfortable and insensitive. Our 3-layered softshell laminate is windproof, waterproof and breathable. A high freedom of movement guarantees the high elasticity.

FLEECE & KNITTED FLEECE

Fleece fabrics offer many functions and thus comfort and are the ideal companion in professional and everyday life. Knitted fleece is the perfect combination of functionality, softness and an urban look! Made to look like a cardigan on the outside, the softly roughened fleece inside offers an optimal thermal insulation and ensures an optimal body climate.

POLYURETHANE

For our AQUALOCK line, we process high-quality polyurethane (PU), which is elastic and highly tear-resistant even at sub-zero temperatures and which can not be damaged by one or two scratches. Thanks to polyurethane (PU), our rainwear is reliably waterproof with a water column of 8,000 mm.

NATURAL RUBBER

The ALBATROS® natural rubber boots largely owe the outstanding quality features - suppleness, resistance and waterproofness - to the properties of this naturally elastic material. The ability to maintain these properties even at low temperatures makes natural rubber an effective moisture protection for every season of the year.

TECHNOLOGIES & MATERIALS

FOR HIGHLY COMFORTABLE WORKING

CORDURA®

CORDURA®

The durable high-performance fabric offers extreme durability and maximum comfort. The permanently dimensionally stable material is water and dirt repellent and serves to reinforce particularly stressed areas of shoes and clothing. CORDURA® is a high-tech fabric made of particularly abrasion-resistant nylon.

COA.TEX® MEMBRANE

The long lasting, water-repellent and wind-resistant hightech membrane is particularly breathable and protects the foot with a microporous mesh structure against waterlogging. It transports sweat and moisture to the outside. What remains is a delightful dry and comfortable body sensation.

ELASTOPAN®

ELASTOPAN® is an innovative, light-weight, multiple-components polyurethan-(foam) system by BASF® with high cushioning properties, slip and abrasion resistance. It guarantees a maximum of safety and comfort to the wearer.

The Thinsulate fibers are thinner than usual polyester fibers, so they offer a high level of heat insulation, while sweat and moisture will be transported to the outside. Therefore the body will be kept warm and dry during cold days.

GORE-TEX®

GORE-TEX® is particularly strong and efficient. The wind- and waterproof membrane keeps the foot dry and offers a pleasant wearing comfort. It provides an optimal foot climate at high breathability.

MULTISHIELD® LEATHER

The special tanning process used for this leather, combines successfully the natural beauty and suppleness of leather with the high performance and durability requirements of the most demanding conditions. Multishield leather, when properly cared for, provide farmyard resistance, resistance to automotive fluids, dilute acids, alkalis and flames. In addition, it remains waterproof and breathable, as well as resistant to mold, even in hot and humid conditions.

BASF® PU

When selecting the materials for our ALBATROS® articles, we attach a certain importance on quality and sustainability. Therefore, we use high-quality polyurethane by BASF® for our shoes and boots.

DESIGN & DEVELOPMENT

TESTED IN LABORATORY - PROVED IN PRACTICE

INNOVATIVE TECHNOLOGY AS A BENCHMARK

Innovative technologies and high quality materials combined with our years of experience serve as the basis for the manufacture of our ALBATROS® products.

An international PSA (personal protection equipment) team actively accompanies the manufacturing and manufacturing of our products and uses our modern ALBATROS® CIP (Continuous Improvement Program) program in factories to leverage advanced production control.

Our employees in product development and product management work closely with research centers and universities to ensure quality, performance-based protective functions and the best materials.

Design and development from Germany.

DESIGN - POWERED BY FUNCTION

We design and develop our ALBATROS® products according to the needs of their wearers. The concepts for safety shoes, workwear and outdoor equipment not only originate in Germany but worldwide according to our specifications.

Inspirations for new products are bundled centrally and the best ideas find the way to get as a product to the ALBATROS® specialist dealers.

Impulses through trade fair visits, trade congresses and design tenders complete the pool of new possibilities and creations.

Design follows function - according to this principle, all the characteristics of a product are set tailor-made. Because quality has been our priority for decades and is based on the high standard of our customers.

HIGHEST QUALITY CLAIMS AS A PERFORMANCE PROMISE

The success of ALBATROS® is based on a complete quality management. Our quality team continuously monitors the development process of ALBATROS® products.

From the selection of materials through the production processes to the optimization of the delivery quality. Inspections and audits by us and our partners ensure permanent and sustainable product and production improvements.

Trainings and trainings according to international standards ensure a constant optimization of the controls both at the production sites and at our headquarters in Lippstadt.

All our products are tested externally, in recognized testing institutes, as well as in the company's own laboratory. There are strict controls in terms of compliance with the safety and quality characteristics.

We do not accept compromises!

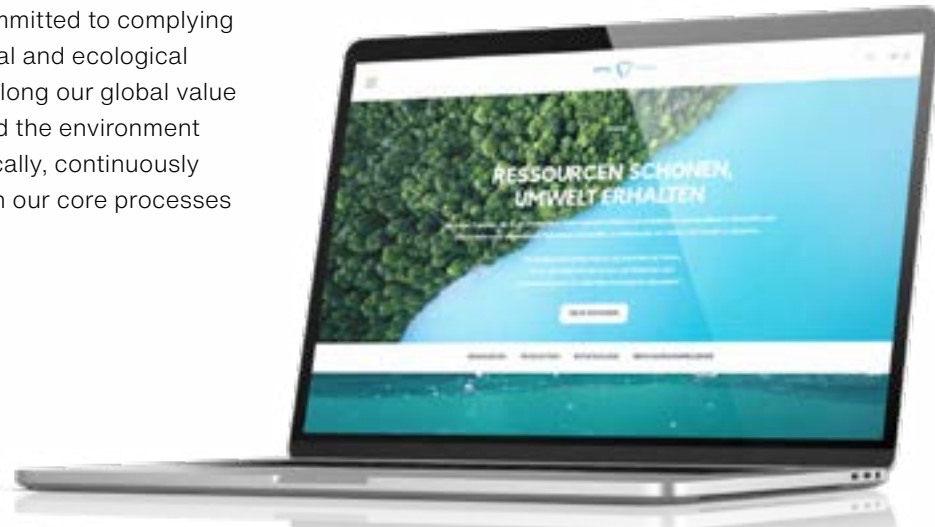

SUSTAINABILITY

RESPONSIBILITY FOR PEOPLE AND THE ENVIRONMENT

SUSTAINABILITY IS NOT A TREND FOR US, BUT A PROCESS

As an owner-managed family company with global economic relationships, we are committed to complying with applicable law, observing social and ecological standards and acting sustainably along our global value chain. Responsibility for people and the environment is consistently implemented holistically, continuously improved and is deeply anchored in our core processes and products.

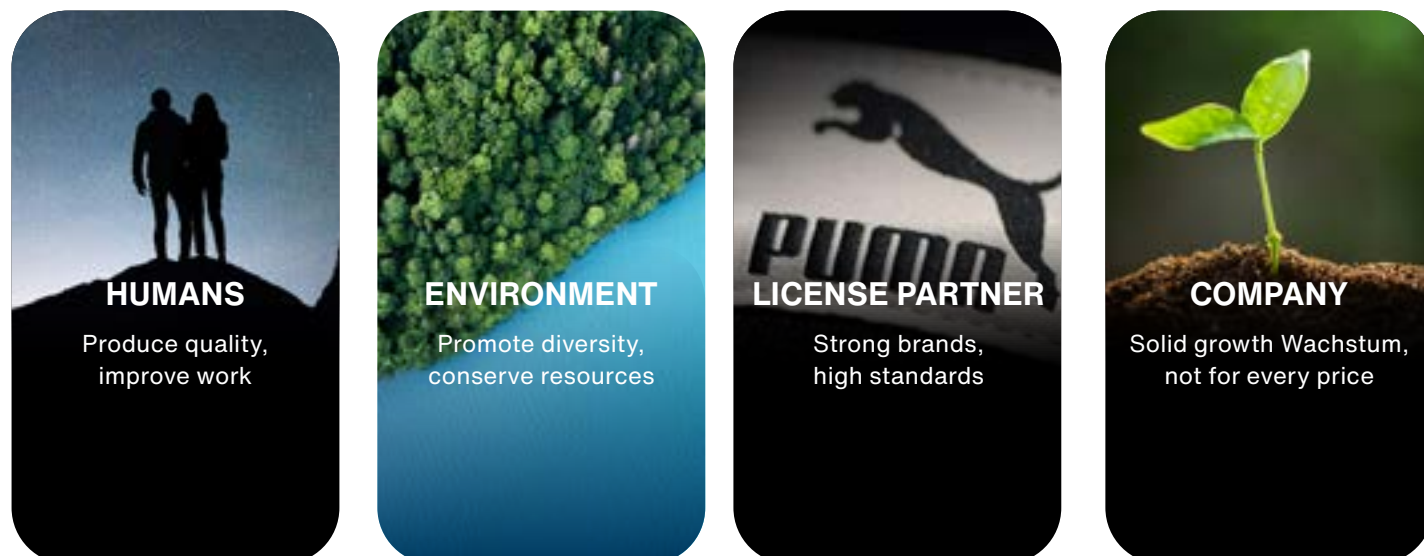

ACTING ECONOMICALLY SUSTAINABLE

In terms of responsible and sustainable corporate management, we are committed to a fair and resource-saving global economy. We act responsibly in our core business and, as an expanding, healthy company, make our contribution to the implementation of the UN sustainability goals.

- ✓ We develop innovations and use our brands as accelerators for positive change
- ✓ We take responsibility for the effects of our actions on others and for our ecological footprint
- ✓ We do not limit ourselves to specific sustainability areas and drive improvements in all areas in which we are active
- ✓ Together with our partners, we find solutions to challenges that we cannot master alone
- ✓ In everything we remain authentic, admit when we do not meet our own expectations and adjust expectations and goals when we have achieved them or achieve them earlier than planned

OUR STRATEGIC FOCUS

CONSERVE RESOURCES, PRESERVE THE ENVIRONMENT

How valuable the natural resources are we certainly do not have to go into further detail.

The economical and efficient use of resources is, of course, our corporate responsibility.

A clear commitment and a good strategy firmly anchor the responsible handling of this limited good in our processes and products.

PRODUCING MORE SUSTAINABLY

We manufacture our products in partner companies in Europe and Asia. This enables us to offer several thousand people long-term employment.

We often have a long-term, trusting cooperation with our production partners. We select them carefully from the start and place high demands on social and environmental standards.

Together we work on challenges that you cannot master on your own and we support you in meeting our standards - also and especially with regard to responsible handling of the environment.
